DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-71 and 79-99, drawn to an apparatus and method of suppressing interference for use in a wireless communication receiver comprising: generating one or more interference hypotheses for interfering signals based on hypothesized combinations of known signal sequences and relative signal delays and testing the one or more interference hypotheses to identify one or more dominant interferers from among the interfering signals, classified in class 455, subclass 67.11.
- II. Claims 72-78, drawn to a method of suppressing interference for use in a wireless communication receiver comprising generating an estimated interfering signal by suppressing the desired signal in a composite received signal and recovering the desired signal from the composite received signal by cancelling the estimated interfering signal from the composite received signal, classified in class 455, subclass 63.1.
- 2. The inventions are distinct, each from the other because of the following reasons:

10/698,206 Art Unit: 2618

- 3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [I] has separate utility such as generating one or more interference hypotheses for interfering signals based on hypothesized combinations of known signal sequences and relative signal delays and testing the one or more interference hypotheses to identify one or more dominant interferers from among the interfering signals. See MPEP § 806.05(d).
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number:

10/698,206 Art Unit: 2618

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan A. Tran whose telephone number is (571) 272-7858. The examiner can normally be reached on Mon-Fri, 10:00AM-6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Anderson can be reached on (571) 272-4177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
